

We offer a variety of ways for easy integration with your company to our data service.

#### WEB SERVICES & INTEGRATIONS

##### Web Service API

Our Application Programming Interface (API), allows your company to order, manage, and retrieve data in real-time, adding tremendous value to your company's efficiency which your customers rely upon.

##### Batch Orders

We can receive orders, in a file with a set of inspections, sent or retrieved via email or ftp. This process can be automated to allow easy order entry and once entered can be managed, tracked and retrieved via our online platform.

##### Online Order Form

Our website, will accept orders via a form which allows your company users, who are registered by you on our system, to enter orders directly into our system and once entered can be managed, tracked and retrieved via our online platform.

## Photoinspection.com Data Services

Our company was founded on the principle of providing timely, actionable data, which remains our top priority today.

Our inspectors and staff conduct and process thousands of inspections a month across the country providing the freshest, most accurate information available to meet our clients business needs.
